Participant Testimonials

“Thanks for a wonderful, unforgettable experience. Truly enjoyed learning, collaborating and eating the world’s best chocolate with the group. Thanks for making us feel welcome.” - Eric, VP & CIO, Publicly Traded Company, US

“Thank you everyone at Disruption Lab for bringing us all together for such a great experience. I will have memories forever, more ideas than I could ever capitalize on, friends that I can’t wait to see again, and a different perspective on both my work day to day and my family life. You put together a fascinating trip and I look forward to the next one!” - Dustin, Senior Business Consultant, US

“There’s been a lot of things I’ve picked up generally looking at different companies, small and big. . .Data is underpinning that, but how that data gets applied and where we’re going to be going, the vision of society as a whole. I’ve got loads of action points. . . There are some massive things for me and I definitely want to be coming back again.” – Kevin, Business Executive, UK

“. . .I’ve got several initiatives I want to institute that come out of this week, so I found it very productive.” - Kenneth, Owner of Commercial Real Estate Com

“I think it’s been a great week... As far as the different companies we visited, I saw some similarities as to what we see in the United States... I was really pleased to see some of the retail applications with the technology with a couple of the places that we went. . . For me it’s been about discovery, so it certainly checked that box.” William, Former Senior Executive with Global Company, U
